ABOUT STONEWALL RESOURCES LIMITED

Stonewall Resources Limited (ASX: SWJ) is a gold mining company that holds a range of prospective gold assets, most of which are located in the world-renowned South African gold mining regions. These South African assets, which include several surface and near-surface gold mineralisations, provide cost advantages relative to other gold producers in the region.

SWJ’s core projects are TGME, located next to the historical gold mining town of Pilgrims Rest, and Sabie Mines, located in the Sabie area, both in Mpumalanga Province, some 370km east of Johannesburg by road or 95km north of Nelspruit (Capital City of Mpumalanga Province).

Following small scale production from 2012 – 2015, the Company is currently focussing on the refurbishment of the existing CIL plant and Elution Circuit and to resume gold production in 2018. The Company aims to build a solid production platform from which it can expand the production profile and extend the mine life of the project.

Beyond its current strategies, Stonewall has access to nearly 40 historical mines and prospect areas that can be accessed and explored.
